Annual Release # 2020-021

Contact Person: Christina Bramlage, Director of Business Operations

For Immediate Release

Our Community has had many challenges over the last two months. We have been in this together and this teamwork has worked well.

The Logan County Health District (LCHD) would like to thank the Rotary Club of Bellefontaine for the very generous donation of personal protective equipment (PPE) for all of the first responders and medical community of Logan County. The donated PPE included personal protective gowns, shoe covers, gloves, temperature strips, N95 masks, and hand sanitizer.

Some gloves and N95 masks were distributed to the Logan County Emergency Management Agency for dispensing to local law enforcement, fire, emergency medical services, and hazardous materials teams.

Thanks to these Rotary donations, the LCHD has been able to supply PPE to Long Term Care Facilities, Health Care Physician Offices, Dentists, and Optometrists/Ophthalmologists. This week the LCHD is using the rest of the donated PPE to pack and prepare 40 small "Push Packs" of PPE's for all of the health care facilities. From here forward if you are in need of PPE, please contact Helen or Kendra at the EMA office: 937-593-5743. Please call between 8:00 AM & 4:00 PM, Monday - Friday. Decisions on distribution then will be up to the Unified Command Team which consists of the EMA, MRH, and LCHD.

Please do your part and wear your mask.
