

What to Do While You Wait for a COVID-19 Test Result

After you get tested:

- Stay home and away from others if:
 - You have not been fully vaccinated
 - You have symptoms or start to feel sick
 - Someone in your home has COVID-19
 - You've been close to someone with COVID-19
- You do not have to stay home and away from others if:
 - You do not have any symptoms and have not been close to someone with COVID-19
 - You got tested for a medical procedure and do not have symptoms
 - You should wear a mask in public indoor settings for 14 days or until you receive a negative test result.
- Start making a plan for what you will do if you have a positive test because you will need to stay home for at least 10 days, even if you do not feel sick.
- Tell people you have been in close contact with recently, that you may have COVID-19. If they are not fully vaccinated, they should stay away from others or at least wear a mask until they hear from you.
- It may take several days to get your test results back. You will receive test results by email, text, and/or telephone call. If you need to follow up regarding your test results, please call the place where you were tested. Please do not call the Logan County Health District to obtain these results.

If your test is positive:

- This means you currently have COVID-19.
- **STAY HOME.** An employee from Ohio Department of Health (ODH) or the Logan County Health District will call you. Please be patient, as our cases in Logan County are very high. It may take a few days before you receive this call. It is important that you answer this call. You will be asked questions about possible exposures to COVID-19, such as people you have been in direct contact with and places you have visited.
- You will be given more information about what you should do and how long you should stay home. You will receive the documents that you and your household members will need to stay home.
- Monitor your symptoms. If they get worse, contact your health care provider or seek immediate medical care.
- If you tested positive, stay home for 10 days and until symptom free. Wear a mask for a full 14 days.
